All reference numerals must be correctly employed in the specification and in the drawings; ie., reference numeral "46" on page 6 is not found in the drawings.

Correction of the above and all similar matters is required.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 5 it is set forth that 4 positioning holes are claimed. Further, in claim 1, line 7 it is set forth that there are "pins" on each of the 4 pillars. Accordingly, there must be at least 8 pins. It is therefor unclear how, as set forth in claim 1, lines 18-20 how the 8 pins fit over the 4 positioning holes.

Claims 8-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3/19/04 and 7/13/04.

Analogous devices are taught by Vander Wal and Witte.
